OBJECTIVE

I'm a seasoned Frontend/Full-Stack Software Engineer with a strong track record in innovation and collaboration. I am skilled in frontend and backend technologies, including JavaScript, React, and Next.js. Experienced in diverse projects such as OTA, e-commerce, Common-Accounting, Chat-Boat AI, and education management web applications. As a software engineer, I aim to contribute to innovative technologies and tackle new challenges.

PROFESSIONAL EXPERIENCE

Software Engineer.

September 2022-Present

TechnoNext Ltd.(A concern of US Bangla Group)

- Designing and developing a web solution for an Online Travel Agency (B2B/B2C).
- Implement JSON Web Token (JWT) methodology for secure authentication and authorization, ensuring user data privacy and system integrity.
- Ensure the web solution is fully responsive, adapting seamlessly to various screens.
- Implemented REST-API integration utilising modern tools.
- Gather requirements for both B2B and B2C segments, including features like flight, hotel, and car rental booking and payment processing.

Jr.Software Engineer.

August 2021-August 2022

Peart Technology Ltd, Dhaka

- Design and develop scalable backend solutions using modern frameworks like Python (Django/Flask).
- Design, develop, and maintain RESTful APIs, ensuring proper data exchange and functionality.
- Implement robust authentication and authorization mechanisms, including JSON Web Tokens (JWT).
- Design and implement efficient database schemas, utilizing technologies like SQL (MySQL, PostgreSQL)

Web Development Intern.

Skill Jobs, Dhaka.

- Actively learn to improve technical skills and deepen software development knowledge.
- Explore the company's tech stack, including technologies and tools like HTML, CSS, Bootstrap, and JavaScript.

SKILLS AND COMPETENCIES

Languages

- JavaScript, TypeScript, NodeJS, Python, Django, OOP, etc.

Frontend Tools

- ReactJs, NextJs, React-Hooks, React-Hook-Form, React-Router, React-Query, NextAuthJs, Zustand, React-Redux etc.
